DETAILED ACTION

1. All outstanding rejections are withdrawn in light of applicant's amendment filed on 10/27/2009.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.
3. The new grounds of rejection set forth below are necessitated by applicant's amendment filed on 10/24/2009. In particular, claim 1 has been amended to limit the amount of block copolymer to 0.3-10 wt % of the fluid medium. Thus, the following action is properly made final.

Claim Rejections - 35 USC § 103

4. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smalley (US 7,074,310).

Smalley discloses a method for separating nanotubes by mixing nanotubes in a fluid such as an aqueous system containing surfactant molecules (col. 8, line 38 to col. 10, line 20) such as block copolymers of polyethylene and polypropylene glycol (col. 10, lines 1-2). In example 1, carbon fibers were mixed in a solution of 1 wt % surfactant by high shear mixing followed by sonication and centrifuge (col. 26, lines 14-31). Some samples include 20 mg/liter of nanotubes in 1 wt % surfactant (col. 26, lines 61-63), which provides for an amount of about 20 wt % carbon nanotubes in the mixture.

Smalley fails to disclose the amount of block copolymer is used in the aqueous system.

Art Unit: 1796

However, given that Smalley exemplifies the use of a 1 wt % surfactant concentration, it would have been obvious to one of ordinary skill in the art to utilize approximately this same amount with another surfactant such as block copolymer.

Response to Arguments

5. Applicant's arguments with respect to Kang have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
